Fall Hats Make Their Debut

THERE is nothing like a new hat to cheer up the sad hearts of women who must reluctantly put behind them the summer's adorable millinery. But the first frost, even the first hint of frost, is the death knell of the summer hats—they are pathetic in anything but rainy, not to say tropical, air, and now the cool September is within hailing distance.

Above a group of hats for early fall wear, cheerfully undertaken to make us forget our summer loves, and will certainly succeed. Glancing over them one may gather the salient features of the new modes—their hand-made elegance, their subtle and conservative lines, the beauty of the fabric used—moulding tulle and similar delicate materials, moire, satin, velvet of the pinks and pinks varieties. Above all we are captivated by embellishments which are revealed in familiar and unfamiliar decorations. And when it comes to ornaments—they are fanciful, endlessly original, even amusing. When you make a little journey into the shops don't be surprised if you find unheard-of things, in miniature, in sports and outdoor hats. A butterfly, a back comb, a few golf sticks and a ball or two unexpectedly reposing among simulated fruits and foliage. "It is to laugh"—and buy them immediately—for the new shapes are, above all, becoming.
